

SYSTEM FEATURES

The Unified Payment Portal's great features and irreplaceable benefits are available to you at no cost!

System Benefits:

The Unified Payment Portal (UPP) offers you benefits no other system can. From the intuitive architecture and system design of our payment platform, our system has truly fulfilled the need for system flexibility in integration. The UPP's unique modular design is so flexible that it not only permits piece-meal integration between your existing systems with ours, but also real time integration of data so that you can perform reconciliations entirely through the UPP.

How this benefits you:

Change can be intimidating and expensive to businesses. Our system is designed to make the transition as pain free as possible. Use our extensive knowledge of the industry and technology to assist you in making the right decisions for your company.

System Features

- One central platform integrates all your payment acceptance and management needs online
- Nothing to buy, install or maintain
- Scalable—supports unlimited number of users, anywhere, all the time
- On-line reporting tools to track and manage all your payments
- Accept any payment using Web, IVR, or Phone
- Real-time payment verification
- Free product training and customer support
- Convenient Post-date and Notification letter services assist in FDCPA and NACHA compliance at an additional charge
